Just want to extend apologies for the confusion and changing directions. Thanks for being flexible and trying to do what is best.

So do we demobilize START as soon as we are done with the Colorado sites with the expectation that we'll do this again after the politicians hash things out in NM? Seems a real waste to pay for all the move/demobe time when we're already here and geared up for NN and NM. Maybe we should reconstitute Area Command to deconflict START for the second round of sampling that may need to be done whenever...

Best laid plans break down at first contact with politics!

Sandie, thanks. I want to give the R 6 WDD feedback about needing better coordination. Any concerns? I don't want to get anyone in trouble. Maybe a conversation when I see him next week, or do we need urgent attention on this?

Has Steve confirmed not to do NM?

Folks, I just talked to Carl Edlund and we will not be sampling in New Mexico until after the meeting with Sec Flynn next week.

Ok, thank you all. We will go ahead with NM sampling now. Rob, I really appreciate you and the other R6 folks' efforts to get the go ahead for these sites as further delay poses an increasing risk of compromising the quality of bio data that we can collect. Thanks for the confirmation.

Hi Dana and Rob, based on R6's discussion with NM and request to add additional sampling sites in NM to our Fall event, we have added 3 sites for NM and are proceeding with sampling. Crews are expected to be in NM tomorrow. If this understanding is in error, please advise immediately. It was my understanding that NM requested these sites and is ok with sampling.

I'm guessing Dana that you meant to email me instead of Sandy Stavnes? Happens a lot. Anyway, the complete matrix of comments is on the One-Drive for the monitoring plan. That was shared with you so you should still have access. Let me know if you are having trouble locating it.

Yes, sampling began this week. We await the ok from Navajo for a few sites but otherwise are on track. We are working with R9 to get the final go ahead for those.

Thx.

Sandie

Fall sampling started yesterday. Steve Merritt (R8 OSC) is leading 2 sampling crews on started at the upper watershed and one at the other end (lake powell I believe). We are not sure which Qs and As you are looking for. We are not sure what you mean by the matrix of questions. Are you referring to water quality sampling plan, the entire universe of questions from the press, 9/4 Mathy meetings or latest round of press questions? I have cc'd several folks on this email who likely will have the information you are looking for so please get

back to us with clarification and we'll respond tomorrow.

Thanks.

Sandy

Folks, I assume Fall sampling is underway in Colorado, please confirm. Sandi, OSWER IO asked for a list of all the questions we received, can you get me the latest matrix on that and our responses, I know that is still in play, but whatever you can get me is great. This is for the NM meeting with Sec Flynn. Thank you.
